EXPERIENCE

Co-Founder

Nina Space

📅 2017 - Ongoing 📍 Lisbon, Portugal

Nina Space is an environmental impact space tech startup. It exists to mitigate megafires

- I am the swiss-army knife
- I lead development - data science on satellite imagery, dev-ops, visualization and platform UI. I code when needed: last thing done - an API.
- I lead the business side of things - won grants from the European Space Agency, and the government of Luxembourg

Data Science Consultant

Various

📅 2016 - Ongoing 📍 Europe

Using AI and data science to multiply the impact of social/civic/environmental projects.

- with Amnesty International: analysing data to a. quantify online abuse against female members of the Parliament in England, b. monitoring oil spill clean-up in Nigeria and potential breaches of legal deadlines
- analysing data to improve homelessness statistics and services across the U.K.

Founder

Sugarwise

📅 2015 - 2016 📍 Lisbon, Portugal

A mobile app to decode nutrition information labels

- applying OCR to label data
- lead a team of 9, served as CEO and CTO
- helped 1000 people make informed decisions and transition to healthier eating habits, which they still follow today

Machine Translation Engineer

Unbabel | Amplexor

📅 2012 - 2014 📍 Lisbon Luxembourg

- developing and optimizing machine translation models
- leading pre-sales and being responsible for Europe and North America
- using A.I. to optimize workflow and task management

SKILLS

Programming languages

ACHIEVEMENTS

💰 raised € 200 000 for Nina Space

I have raised €50 000 from ESA, and €50 000 from Fit4Start, with the possibility of receiving €100 000 given we find a private investor to put in €50 000. I found 2 such investors.

Woman Entrepreneur in Space Tech

This award was given to me in 2018 in Toulouse during Act in Space and Toulouse Space Show

graduated from Fit4Start (F4S) Luxembourg

F4S is a very competitive acceleration program which slingshots tech startups into the air
